Professional Summary

Full-Stack Developer and BCA student experienced in building web applications with Java, Spring Boot, and React.js. Skilled in creating secure RESTful APIs, setting up JWT authentication, and integrating AI features while writing clean, efficient code based on strong DSA fundamentals.

Education

Asansol Engineering College

Asansol, WB

Bachelor of Computer Applications (BCA) — MAKAUT

Expected June 2027

- **Core Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs) with Java, Database Management Systems (DBMS), Operating Systems, and Software Engineering Principles.
- **Academic Focus:** Specialized in core Java backend architectures, modular API design, and building scalable data-driven full-stack applications.

Technical Skills

Languages: Java (Core & Advanced), JavaScript (ES6+), SQL, HTML5, CSS3

Frontend & UI: React.js, React Router, Responsive Web Design, UI Development, CSS Styling, Component-Based Design

Frameworks & Libraries: Spring Boot, Spring Security, Spring AI, Hibernate ORM, Spring Data JPA

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Postman API Client, Maven, Render, Linux CLI

Concepts & Architecture: RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), Asynchronous Programming, Generative AI Integration, Data Structures & Algorithms

Projects

Gaming AI E-commerce Store | *Spring Boot, Spring AI, React.js, MySQL, Spring Security, JWT, Razorpay* 2026

- Built and deployed a full-stack e-commerce platform designed to handle digital game catalogs and secure transactional storage.
- Configured Spring Security layers to enforce stateless JSON Web Token (JWT) verification and role-based endpoints to prevent unauthorized access.
- Designed relational MySQL schemas using Hibernate ORM to clear database execution blocks and optimize complex checkout pipelines.
- Integrated Razorpay payment gateway along with active webhook configurations to safely receive transactional payloads and update database records.
- Developed an interactive UI using React.js, implementing client-side persistent storage to decrease page rendering lag during traffic spikes. | **Source:** [Code Link](#) | **Live:** [Deployment Link](#)

Smart AI Email Assistant | *Java, Spring Boot, Spring AI, React.js, Gemini API, Chrome Extensions* 2026

- Developed a smart email workspace utility that structurally interprets incoming text blocks to generate appropriate responses using LLMs.
- Utilized Google's Gemini API via structured Spring AI backends, using customized prompt frameworks to shift text tone dynamically based on selections.
- Established robust REST API entry points inside Spring Boot using global exception handling blocks, strict validations, and decoupled service layers.
- Built a companion Chrome Extension with JavaScript and React hooks to enable users to use the text generation engine directly from major webmail portals.
- Optimized asynchronous runtime routines to prevent network thread bottlenecks, dropping UI render freezing periods noticeably. | **Source:** [Code Link](#)

Certifications & Achievements

- **Competitive Programming Profile:** Active problem solver on LeetCode; routinely implementing optimal array transformations, string manipulations, tree traversals, linked list operations, and complex dynamic programming algorithms.
- **Technical Competition:** Secured **1st Position** out of multi-team entries in the high-intensity **Game Development Workshop 2.0** organized and adjudicated by DevSoc Asansol Engineering College.
- **Professional Certification:** Completed an intensive industry-aligned training course on **Web Designing with HTML, CSS, and JavaScript**, mastering advanced layouts and cross-browser responsiveness. | [Credential Link](#)
